

# Summer School

## Towards building sustainable and co-created telemedicine systems in Western Balkan Countries

Tirana, Albania. September 4-8, 2023

The Summer School addresses all medical topics towards building sustainable and co-created telemedicine systems in Western Balkan Countries.

Distinguished members of the faculty will give presentations on relevant telemedicine topics and show up-to-date devices or applications used. Round table discussions and workshops are organized to further deepen your knowledge. Especially for young researchers, sessions and forums are organized to present ideas and enable hands-on activities.

You will be able to visit a local telemedicine center and learn more about the culture of the country. The summer school will be concluded by an excursion to take away cultural and scenic impressions of Albania.
