Summer School:
Telemedical Care Pharmacy and AI Integration in Advancing Digital Health
Sarajevo, Bosnia, and Herzegovina.
September 2-5, 2024

The Summer School is a dynamic and forward-thinking educational initiative designed to empower the next generation of healthcare innovators. Over the course of one intensive week, participants will embark on a transformative journey at the intersection of pharmacy, artificial intelligence, and digital health. This program aims to equip young scientists and healthcare professionals with the knowledge, skills, and collaborative mindset needed to drive positive change in healthcare through interregional collaboration, resulting in innovative technology solutions.

Special emphasis is placed on fostering dynamic interactions through discussions with esteemed experts in the field, providing participants with invaluable insights and firsthand experiences. The program is designed to encourage direct consultations, allowing attendees to delve deeper into specific topics, seek personalized guidance, and cultivate a comprehensive understanding of the intricacies within the intersection of pharmacy, artificial intelligence, and digital health. This interactive approach not only promotes collaborative learning but also creates a supportive environment for participants to address individual queries, refine their perspectives, and gain practical knowledge from leaders in the respective domains.

The following sessions are planned:

- Introduction to Pharmacy and AI integration
- Collaboration in academia and fostering professional growth
- Network of Young Researchers in Pharmacy and Artificial Intelligence
- Digital Health Technologies
- Interaction Between Health Practitioners and Patients in the Digital Health Context
- Foundations of Artificial Intelligence in Pharmacy
- AI Applications in Healthcare and Pharmacy
- Revolutionizing Pharmaceutical Practices: The Integration of AI
- Sustainability and Ethics workshop
- PhD Panel, Poster sessions and Students' challenge.
